

Aircraft Carriers

Playing a critical role in the Queen Elizabeth Class Aircraft Carriers, Babcock International worked proudly and collaboratively with Aircraft Carrier Alliance partners to deliver the historic aircraft carrier project over the last decade.

Design

Utilising our UK wide facilities and a wealth of specialist knowledge and experience, Babcock delivered over 50% of the detailed design for the Aircraft Carriers, ensuring this remains one of our flagship programmes.

Build

Manufacturing of key components, systems and final ship assembly at Rosyth, our longstanding engineering heritage is clear to see.

Delivered in excess of 12K T of manufacturing components including 8 major blocks, 285 sponson units and 61 catwalk units.

Support

Babcock completed the first docking and maintenance period for HMS Queen Elizabeth in 2019, benefiting from a highly qualified and flexible workforce, steeped in Carrier experience.

Infrastructure

Babcock Rosyth's facility is one of the most modern, capable and competitive manufacturing and repair facilities in the UK.
